

# CARRY ON

Expanding life.

**Hapro**  
—carriers—

Strength and reliability.

**FREE  
TIME.**

*...so you'll be taking the bikes  
along too!*

# HAPRO CARRIERS, YOUR PERFECT PACK MULE.

*Your car is not a stubborn beast of burden.*

The cleverly designed Hapro Atlas and Hapro Strada bicycle carriers will carry your entire family's bikes with pleasure. And with the Hapro Giro your car will shoulder your bikes without complaint. So you can take along everything you need in the best way possible. Safely, quickly and easily mounted and securely locked in place, for years of travel pleasure.

# HAPRO ATLAS, HIT THE ROAD WITH EASE.

*Powerhouse with a friendly nod.*

The Hapro Atlas is a very cleverly designed, exceptionally compact and attractive looking bicycle carrier for the back of your car. Strong, safe and covered by a three-year warranty, the Hapro Atlas is the reliable partner for adventurous excursions. Attaching and securing this elegantly designed bicycle carrier couldn't be simpler: thanks to the quick mounting system, rock-solid attachment to any common towing hook is accomplished with just a flick of the wrist.

**CARRYING... POWER!** Carry electric bikes? With ease! The Hapro Atlas 2 Premium E-bike does it. Thanks to the sturdy construction it has a greater carrying capacity, and the additional distance between the wheel holders provides sufficient room for two electric bicycles with a battery or even a central motor.

**Quick mounting system:**

The Hapro Atlas provides quick, rock-solid attachment to any common towing hook. What's more, this bicycle carrier is designed for easy tilting, even with bicycles in place. So you can access the boot without any need to remove the bikes.

**Wheel holders:**

The adjustable wheel holders slide easily, so the bicycle wheels can be positioned perfectly before being secured in place with the quick-fit clasps.

**Frame holders:**

The frame holders can be easily repositioned for the perfect fit and provide optimum stability. The soft protective layer on the inside prevents sliding and damage to the bicycle frame. Each of the frame holders has a separate lock.

**Theft prevention:**

To prevent theft, the lock on the towing hook mounting system ensures that the bicycle carrier cannot be detached without a key.

**Light units:**

The two Premium versions are equipped with fold-away light units. This allows the number plate to be easily slid in and protects the lamps while in storage.

## SOPHISTICATED CARRYING SYSTEM

The Hapro Atlas is designed to be tilted, so you can access the rear hatch without having to remove the bicycles. With the Hapro Atlas you can easily take along one, two or three bikes. The two Premium versions, one of which is also suitable for e-bikes, are equipped with fold-away light units. This allows the number plate to be easily slid in and protects the lamps during storage.

A man and a woman are riding bicycles on a paved path. The woman is on the left, wearing a blue cardigan over a white top and white pants. The man is on the right, wearing a light blue plaid shirt and white shorts. They are both smiling and looking towards each other. The background is a bright, open landscape with a clear sky.

# LEAVE YOUR CARES BEHIND.

*...take the bicycles with you.*

# HAPRO STRADA, SIMPLY UNIQUE.

*Stylish, strong specimen.*

The Hapro Strada is an elegant, lightweight, compact bicycle carrier for the back of your car. You quickly and firmly attach the handsomely designed, largely aluminium Hapro Strada to the towing hook using the One-Move-Lock system: mounting and locking all in one simple motion. You also get the peace of mind of a 3-year warranty.

Have electric bicycles? No problem! The Hapro Strada E-bike M perfectly accommodates one or two e-bikes. Thanks to the additional distance between the wheel holders there is sufficient room for two electric bicycles with a battery or even a central motor. With the (optional) drive up rail the bicycles can be easily rolled onto the carrier, without lifting, so you can quickly be on your way.

**Easy-Slide:**

The Hapro Strada's Easy-Slide system provides access to the rear hatch at all times. Using this special system, you pull the (loaded) bicycle carrier towards you with ease, allowing access to the boot. This makes it simple to carry up to three bicycles while retaining access to the rear hatch. With the extension kit you can even carry four bicycles, with the same ease!

**Theft prevention:**

Thanks to the lock on the towing hook mounting system, the Hapro Strada stays where you put it, preventing theft.

**Frame holders:**

The frame holders with special hold-down straps hold any bicycle securely and have individual frame locks.

**Wheel holders:**

The wheel holders can be easily slid to the correct position.

# HAPRO GIRO, STYLISH TRANSPORT.

*On the shoulders...*

For transport of one or more bicycles on top of your car the Hapro Giro is the solution. Stylish aluminium design features beautifully designed plastic components that hold every bicycle in an unbreakable grip. Quality, backed by a 3-year warranty.

**LOADED SIMPLICITY.** You can carry all of the family bicycles using several Hapro Giros. The sophisticated Fit-Lock system makes loading a snap and allows you to bring along your bicycles to the chosen destination, safely and comfortably. The Hapro Giro is suitable for carrying up to 17 kg. When the Hapro Giro is not in use, it is easy to fold up for less wind resistance, and looks good, too. The Hapro Giro is also the perfect companion to a Hapro roof box.

**Strong and slender:**

When the Hapro Giro is not in use, it is easy to fold up for less wind resistance, and looks good, too.

**Fit-Lock:**

Every bicycle frame with a round profile of between 22 and 80 mm or oval profile measuring up to 80 x 100 mm snaps into place simply and safely with the Fit-Lock system.

**Quick en flexibel:**

Adjustable wheel holders.

**Protect your belongings:**

Lock on the bicycle frame mount.
